TECHNICAL SKILLS

- Languages** : Python, HTML & CSS, SQL
- Frameworks** : Wireshark, Nmap, MITRE ATTACK
- Cybersecurity** : Vulnerability Assessment, Incident Response, Threat Management
- Soft Skills** : Communication, Problem-Solving, Teamwork, Adaptability

EXPERIENCE

Web Developer– College Portal

Aug 2025 – May 2026

<https://ims.fcrit.ac.in/>

- Developed and maintained the live college portal (PHP, MySQL) serving students, faculty, and administration.
- Migrated the existing PHP codebase to Laravel, adopting MVC architecture and Eloquent ORM for improved maintainability.
- Hardened portal security by patching file-upload vulnerabilities and implementing server-level defence-in-depth measures.

Freelance Python Developer

2024– 2025

Uttkarsh Minds

- Developed a dynamic quiz platform using Python and Flask to automate assessments.
- Implemented Excel-based data ingestion and quiz generation workflows.

EDUCATION

Fr. Conceicao Rodrigues Institute of Technology

B.E in Information Technology

2023 – 2027

Vani Vidyalaya College of Science and Commerce

Higher Secondary (12th), Science

Jun 2021– May 2023

PROJECTS

Cyberwatch AI– SOC-Style Threat Intelligence Platform

Python, Flask, SQLite, JS

[Github](#)

- Built a SOC-style platform to collect, process, and visualize cyber threat data from multiple public intelligence feeds.
- Integrated CISA KEV, NVD CVE, and URLhaus feeds for real-time vulnerability and malware intelligence.
- Developed a live monitoring dashboard with geolocated threat visualization, event streaming, and severity-based alerting.

Phishing Detection System

Python, Machine Learning

[Github](#)

- Developed a machine-learning-based system to detect phishing URLs, emails, and SMS messages using URL structure, email content, metadata, and security heuristics.
- Extracted features such as URL length, suspicious keywords, redirects, domain patterns, urgency, and credential requests.
- Trained and evaluated classification models to improve phishing detection accuracy and provide explainable risk evidence.

Advanced Machine-Learning Intrusion Detection

Python, Flask, Scapy, Socket.IO, Random Forest/XGBoost/GRU

[Github](#)

- Built a local network intrusion detection system on the UNSW-NB15 dataset, combining ML classification (Random Forest, XGBoost, optional deep-learning models), anomaly detection, and signature-based rule checks for real-time risk scoring.
- Engineered a live Flask/Socket.IO dashboard with packet/flow capture via Scapy, MITRE ATT&CK technique mapping, alert correlation/deduplication, and incident investigation workflows.
- Designed SENTINEL-TRAP, a safe multi-service deception layer (HTTP, SSH, FTP, DB decoys) to capture attacker sessions, fingerprints, and payload metadata for threat-intelligence enrichment.

AutoVuln Scanner

Python, Flask, Nmap, SQLite, NVD API [Github](#)

- Built a full-stack vulnerability assessment platform combining Nmap-based port/service scanning, banner grabbing, and version analysis with SQL injection, XSS, and security-header checks.
- Integrated NVD CVE/CVSS lookup, TLS/weak-cipher checks, and DNS subdomain discovery, with live scan monitoring, scheduled scans, and webhook alerts.
- Implemented authentication, API tokens, target isolation, and PDF/HTML reporting, with health diagnostics and automated SQLite backups for production deployments.

LEADERSHIP

Joint Creative Head, AIDL Club

Fr. Conceicao Rodrigues Institute of Technology *June 2025– June 2026*

- Designed promotional posters and creative content for various club events.
- Led a team to plan and execute event branding and outreach.

ACHIEVEMENTS

Finalist – KnowCode 3.0

Project: APIBazaar – Cloud-Native API Deployment Platform *2025*

- Built a platform that transforms API documentation into live, deployable services instantly using Kubernetes and Docker.
- Designed an automated pipeline to parse API specifications and provision containerised endpoints on demand.

Football Tournament

Winner *2024*

- Won the Kalyan championship football tournament.

CERTIFICATIONS

- Career Essentials in Cybersecurity – Microsoft & LinkedIn
- Cybersecurity Fundamentals – IBM SkillsBuild
- Generative AI – NxtWave
- Cybersecurity Job Simulations – Deloitte, PwC US, Tata Group
